

# SCAFFOLD APPRECIATION ON SITE

## INTRODUCTION

A large percentage of accidents happen from falls so it is not surprising that companies are demanding only certificated operators be allowed to use such equipment on their premises/site. This course is essential for persons who use scaffolds regularly in their line of work and for site managers responsible for employees working from a scaffold. The course provides excellent training for those required to undertake mandatory scaffold inspections.

## WHO SHOULD ATTEND

Those who have responsibility for the management of scaffolding on site which may or may not include the requirement to carry out the legal duty to inspect.

## COURSE DURATION

PFA Consulting offer this course over 1 day.

## COURSE OVERVIEW

The course, which is part theory and part practical, involves:

- Classroom based training on the safety issues whilst working at height either from towers, ladders or steps.
- Practical training in the erection and dismantling of portable towers.
- Understanding the legislation governing the use of scaffolding and the application of NASC SG4:05.
- Identifying and understanding the use of the various components.
- Understanding the erection sequence and the fixing of scaffold members.
- Learning the requirements for protection to prevent falls of persons or objects.
- Selecting equipment used to mitigate the outcome of a fall.
- Selecting ladders or alternative means of access and egress.
- The selection, use, storage and maintenance of fall protection equipment.
- Understanding how to complete the scaffold register.
- Carrying out a practical scaffold inspection.

## COURSE REQUIREMENTS

The Client needs to make available a site within reasonable proximity to the venue used for the theory presentation, for practical inspection. Delegates are required to have their PPE available for work on site.
